Outreach International is a global nonprofit that supports local leaders and community-led groups who develop lasting solutions to poverty-related issues.

Our Mission
Together with local leaders of impoverished communities, we empower people to organize, identify their poverty-related issues, and mobilize to access the resources necessary to overcome challenges and reach their goals. Along the way, communities gain the experience of working together toward a shared objective, as well as the confidence that comes from achieving success through collaboration. Facilitating the methodology of Participatory Human Development ensures that those most affected by poverty-related issues become those best equipped to permanently resolve them.

**ALL COMMUNITY LED AND COMMUNITY DRIVEN.**

When a rural community decides to work with Outreach, our field staff facilitates group discussion among locals so they can identify, prioritize and ultimately act to resolve their most pressing issues in an atmosphere of collaboration and trust. All decisions are made by community members. Outreach field staff functions in a support role to provide guidance and encouragement to community-led groups, as members work to access resource networks, obtain materials, and work together to reach their development goals.
